The testing laboratory meets the requirements of DIN EN ISO/IEC 17025:2018 to carry out the conformity assessment activities listed in this annex. The testing laboratory meets additional legal and normative requirements, if applicable, including those in relevant sectoral schemes, provided that these are explicitly confirmed below.

The management system requirements of DIN EN ISO/IEC 17025 are written in the language relevant to the operations of testing laboratories and they conform to the principles of DIN EN ISO 9001.

manual non-destructive testing (radiographic -, ultrasonic-, magnetic-, penetrant- and visual testing) in the fields of metal manufacturing and metal processing industry as well as in installation engineering and industrial plant engineering and construction

Flexible Scope of Accreditation:
The testing laboratory is permitted to use standardised or equivalent test methods listed here with different issue dates without being required to prior inform and obtain approval from DAkkS (flexibilization according to category A).
The testing laboratory has an up-to-date list of all test methods within the flexible scope of accreditation.
The list is publicly available on the website of the testing laboratory.

The procedures are indicated with the following symbols of the locations where they are carried out:

F = Feucht V = Vettweiß
